

## Company Information:

### About Oceaneering:

Oceaneering is a global oilfield provider of engineered services and products primarily to the offshore oil and gas industry, with a focus on deepwater applications. Through the use of its applied technology expertise, Oceaneering also serves the defense and aerospace industries. Oceaneering's business offerings include remotely operated vehicles, built-to-order specialty subsea hardware, deepwater intervention and manned diving services, non-destructive testing and inspections, mobile offshore production systems, and engineering and project management.

Oceaneering Space Systems (OSS) concentrates on developing, integrating, and applying both new and established technologies to the challenges of operations in space and other harsh environments. OSS specializes in turn-key design, development, manufacturing, certification, maintenance, testing, and sustaining engineering of: thermal protection systems for rockets; equipment for humans to use in space (EVA and IVA); and robotic systems for military, space, and biological research applications. We also provide specialized engineering and support services in these areas, and astronaut training in NASA's Neutral Buoyancy Laboratory and Space Vehicle Mockup Facility.
